Re: Prices of public notices: **PLEASE SAVE**

June 11, 2018

At the direction of the INA Board of Directors and the Government Relations Committee, the INA works with the Iowa Department of Management and other state agencies in an effort to determine the maximum cost that may be charged for each public notice prepared on a form.

The instructions in the INA Publishers' Handbook for computing the cost of a photographed notice were followed by the INA when computing the costs for the following notices. The rates which are effective for notices published on or after July 1, 2018 were used. For the most part, the notices have been designed by the state agencies to comply with the newspaper industry's Standard Advertising Unit column measure. You may enlarge the notice or reduce it (so long as the type size does not fall below six-point type). In any event, you should not charge more than the price listed below for each notice.

In some cases, the government unit placing the publication may add explanatory information at the bottom of the form. The price per line for that matter is also listed below.

These notices are identified by a notice code usually found in the upper left-hand corner of each notice.

These rates plus additional information regarding public notices can also be found online at [www.INAnews.com](http://www.INAnews.com). If you have any questions, please feel free to call the INA for help.
